## NCI-H1299

### Human non-small cell lung carcinoma cell line

Cat. No. HC126

#### Cell Line Description

This cell line was derived from a lymph node metastasis. The patient received initial radiotherapy. The cells homogeneously partially lack p53 protein and lack p53 protein expression. The cells can synthesize 0.1 pmol/mg protein of NMB protein but do not synthesize gastrin-releasing peptide (GRP).

#### General Information

Cell Name	Human non-small cell lung carcinoma cell line
Abbreviation	NCI-H1299
Organism	<i>Homo sapiens, human</i>
Organizational Sources	Lung
Morphology	Epithelioid / Polygonal
Growth Properties	Adherent
Specification	1×10 <sup>6</sup> cells/T25
