

Product Manual

COLO 205

Human colorectal adenocarcinoma cell line

Cat. No. HC141

Cell Line Description

This cell line was isolated in 1957 by T.U. Sample et al. from the ascites of a 70-year-old Caucasian male with colon cancer. The patient had been treated with 5-fluorouracil for 4-6 weeks before the ascites sample was taken. Positive for keratin immunoperoxidase staining.

General Information	
Cell Name	Human colorectal adenocarcinoma cell line
Abbreviation	COLO 205
Organism	<i>Homo sapiens, human</i>
Organizational Sources	Colon
Morphology	Epithelioid
Growth Properties	Semi-adherent
Specification	1×10 ⁶ cells/T25
